## ROLL CALL (INSPECTION) AND RUN ORDER

### FOR THESE EVENTS WE WILL BE HOLDING A “ROLLING ROLL CALL”

Inspections will begin 15 minutes before your scheduled Time Block. We inspect the dogs as they arrive at the field.

Dogs must be checked-in and inspected prior to **EACH** run. Inspection will check for general fitness and for females in season. Females in season and lame dogs are not permitted to run. Handicaps will be verified at inspection.

We will have a rough run order within each time block. This will be sent out after closing. If you have a catcher or a releaser, make sure they are in the correct area at LEAST three dogs ahead. This really helps to keep things moving!

If you have a 2<sup>nd</sup> run within the same Time Block you must come back and be re-inspected. If you have a 2<sup>nd</sup> run in another Time Block – please come back at that time.

We will do our best to work around conflicts.

#### Time Blocks

We will be using the “block schedule” running order. Due to the new Lure Operator rules, we will be assigning time blocks based on breed groups. We will send out Time Block information after closing.

We will have four time blocks each day (8 am to 10 am, 10 am to Noon, Lunch from Noon to 1 pm, 1 pm to 3 pm, and 3 pm to 5 pm).

#### Concurrent Run Scheduling

We run events CONCURRENTLY. If you sign up for both tests per day, you will run them in the same time block.

### NOTICE

The number of motels refusing dogs because of abuse of their premises continues to increase. We expect our exhibitors to be responsible guests.

A report that an exhibitor at this show has abused motel property during this Show May result in disciplinary action by the Club. Sedalia Kennel Club reserves the right to decline future entries from the offending party in accordance with the provisions of Chapter 11, Section 15 of the Rules Applying to Dog Shows.

## EQUIPMENT AND CREW

**Lure Equipment:** We will be using a continuous loop pully system.

The lure or “bunny” consist of white plastic bags. Additionally, a squawker is sometimes used – if track conditions allow. The lure is attached to string that is set in a continuous loop and the string is pulled/pushed by an electric motor.

**Timing Devices:** CCSC uses a brake-beam electronic timing device.

**Field Conditions:** The field is fairly level. The surface is grass that is mowed short. The track is fully fenced with welded panel fencing. Mounted entry and exit gates are also part of the track. Handlers may walk the course to the catch area BEFORE their dog is released.

**Huntmaster:** The Huntmaster is in complete charge of all dogs and handlers on the field. They are responsible for calling the next dog/handler onto the course. They are responsible for making sure the correct dog is on the start line. They are responsible for checking collars. The Huntmaster explains the release and, if necessary, the retrieval before the dog is released. They are responsible for making sure the lure is in position and traveling in the correct direction before calling the dog/handler onto the course. The handler should communicate to the Huntmaster any special needs the dog may have (Fast, slow, old, new). The Huntmaster will communicate any needs to the Lure Operator. The Huntmaster shall question the Lure Operator, Timer and handlers asking, “Are you ready?” After affirmative answers from all parties, the Huntmaster will begin the course. Provides a hand signal to the Lure Operator to start the lure. Gives the verbal signal “Tallyho” to release the dog from a standing start. The dog should not be slipped before the sound of the “T” in “Tallyho.” Will notify the Lure Operator, Timer, and Handler of any issue with the release or the course that results in a rerun or a non-qualifying score. The Huntmaster shall stop the lure in the event of a safety issue with the course or the dog.

**Lure Operator:** The Lure Operator is responsible for communicating to the Trial Chair, any concerns regarding the track layout. They are responsible for operating the lure in a safe manner for all breeds. The Lure Operator will make a test run beforehand. The Lure Operator will receive communication from the Huntmaster regarding any special needs a particular dog may have (fast, slow, old, new, etc.). The Lure Operator will do all they can to get the best time for your dog. The Lure Operator will not move the lure at the end until the dog is leashed and off the course. For the utmost safety, the Lure Operator will position themselves so that they have a view of the entire course and will watch the dog the entire way until the dog is leashed and off the course. The Lure Operator will stop the lure on a signal from the Huntmaster, but shall automatically stop the lure any time a dog becomes entangled in the string or when a potentially dangerous situation may develop

**Queuing Up:** After dogs have been roll called and put in a run order, we will line them up about 6 at a time. Anyone that does not have a catcher or a releaser in place and ready could be moved back in the order. Dogs who are not present

for their Time Block will be added to the next available Time Block – except for conflicts. Conflicts will be handled on a case-by-case basis at the field. We strive to keep the track running smoothly with as few delays as possible. For more information see the section on Time Blocks

## HOW DOES FAST CAT WORK?

### Tests, Titles, and Timing

1. Fast CAT is a timed straight run of 100 yards.
2. Each dog runs alone.
3. Dogs may start a maximum of 10 feet behind the starting line. The 10-foot starting line will be clearly marked.
4. The dog's time to complete the 100-yard dash is converted to miles per hour using the following formula:

$$mph = \frac{204.545}{\text{time in seconds}} \text{ (rounded to hundredths)}$$

5. A handicap system is applied to a dog's mph to determine the number of points earned.
6. The handicap system is based on the height of the dog at the withers:
  - a. 18" or greater: handicap is 1.0
  - b. Over 12" and under 18": handicap is 1.5
  - c. Under 12": handicap is 2.0
7. Points = mph multiplied by the dog's handicap
8. Fast CAT suffix titles are earned at designated milestones:
  - a. BCAT = 150 points
  - b. DCAT = 500 points
  - c. FCAT = 1,000 points
  - d. FCAT# = each additional 500 points
9. Timing devices: The time to complete the 100-yard dash is recoded to the nearest 1/100th of a second (e.g., 9.11). The club May use stopwatches or break-the-beam equipment to obtain the tie. If stopwatches are used, there shall be two timers positioned at the finish line. An individual at the start line shall signal with an arm drop the moment the nose of the dog crosses the start line. The timers shall start their stopwatches at the bottom of the arm drop. The timers shall stop their watches when the nose of the dog crosses the finish line. The times from the two stopwatches shall be averaged to determine the recorded time.
10. Area of the course will be fenced with a fence-in recovery area of 30 yards or longer, with 50 yards recommended.
